

SendTo Menu Editor v1.3

[Sordum Team](#) | [May 3, 2023](#) | [51 Comments](#)

The Windows 'Send to' menu is a handy way of sending a file to a specific folder, application, or other item. You can use it to send, copy, or print an individual file to a specific location, device, application, or other item. If you want to add your own app or folder to the Send to menu or if you want to delete some of the Unnecessary items in it you can tweak the Send to menu to suit your needs. Open File Explorer in Windows Right click on a file and From the pop-up menu, move your mouse to the Send to command, Click on a specific entry. The file you click on is then sent to the entry you select.

If you want to add your own app or folder to the Send to menu, it's very simple: Just open the Run dialog box by pressing Win+R, then paste [shell:sendto](#) command into the text box. This will open the folder where all those shortcuts located. Alternatively, you can navigate to following folder location

[%UserProfile%\AppData\Roaming\Microsoft\Windows\SendTo](#)

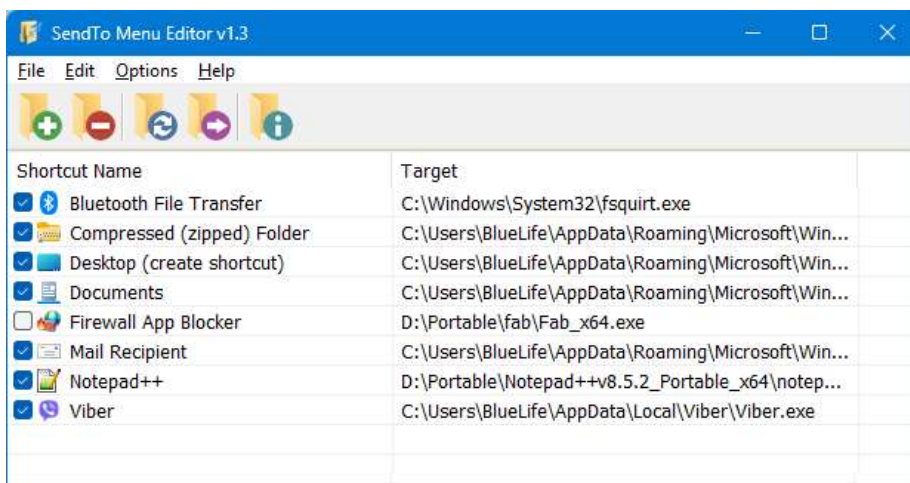

But you can simplify the whole process with the "Send To Menu Editor" is a portable freeware which helps users manage the shortcuts present in the Windows "Send To" Menu.

What is New (Wednesday, 3 May 2023)

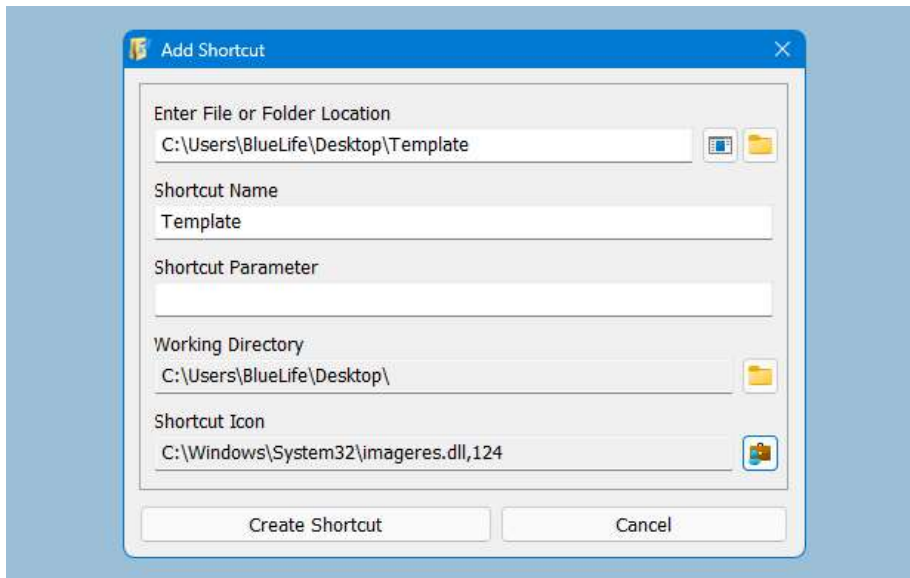

1. [FIXED] – Unable to add a folder shortcut to the software interface
2. [ADDED] – A Feature for default user to restore files in SendTo folder
3. [ADDED] – Some code Improvements

How to use SendTo Menu Editor

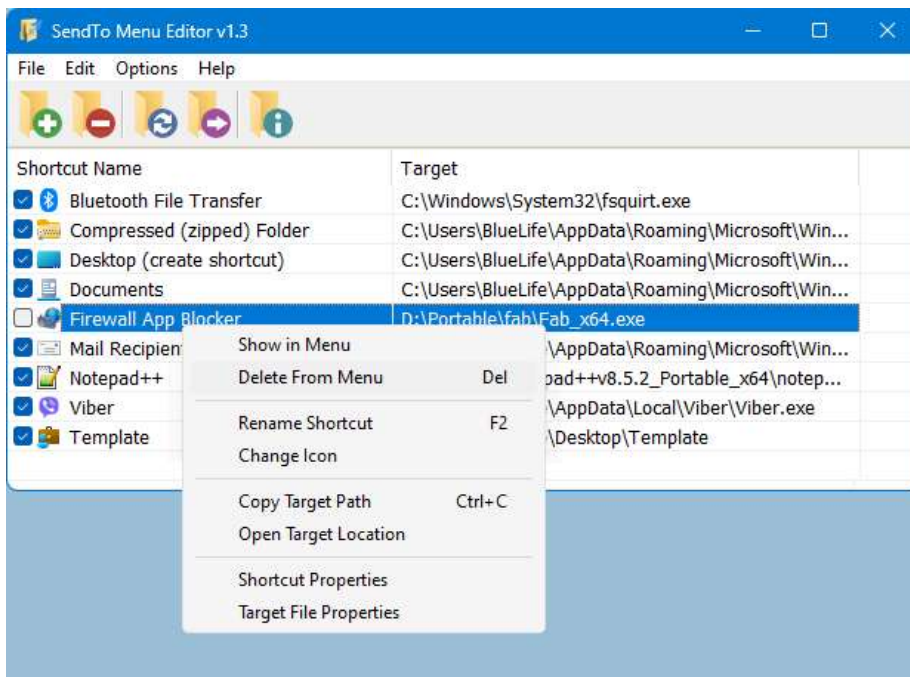

After downloading, extract "SendTo Menu Editor" to your desired location and run Appropriate one (x64 or x86)

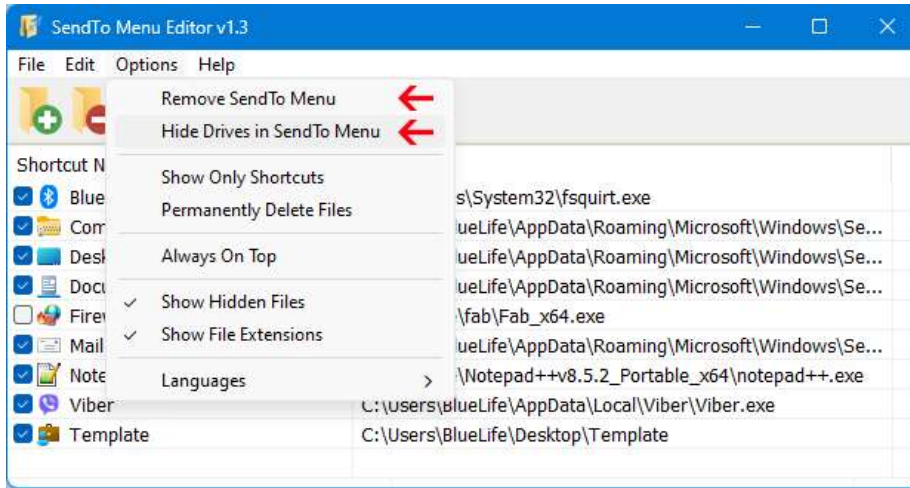

On GUI you will see all of the send to Menu items , to add a new one use plus icon or just drag and drop it on main window. If you use Add Button you can edit Shortcut name , you can use a Shortcut Parameter or change the Shortcut Icon.

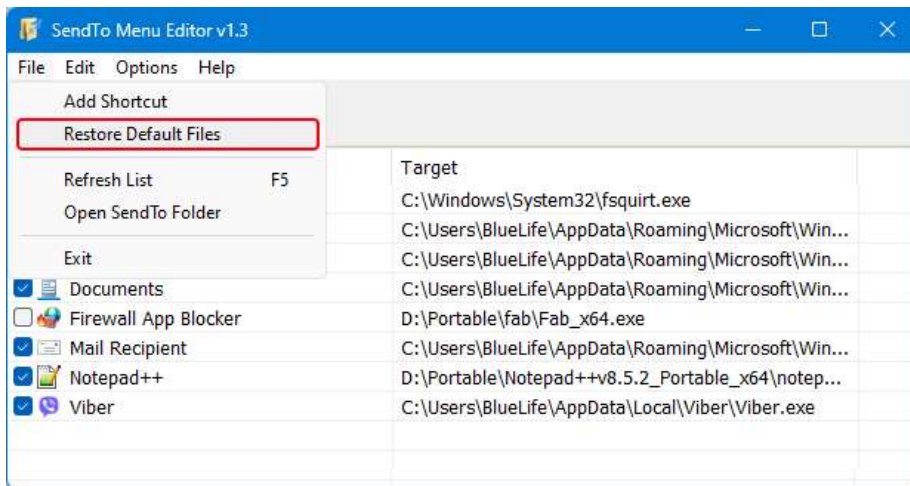

To delete a Send To Menu item use delete icon or right click any listed item and choose **"Delete From menu"** feature.

You can hide the related entry by removing the check mark at the beginning of the items in the list. If you want to remove Send to menu completely use **Options – Remove SendTo menu** choice , you can also hide all of the Dirves by using **"Hide Drives in SendTo menu"** both options require administrator privileges.

If you accidentally delete a component from the **Send to menu**, or if some components are missing from the corresponding menu, use the **File - Restore Default Files** command from the top menu to restore the default components in one click.

Note: The program interface does not show removable drives. It only shows shortcuts and files in the **Send To folder**.

Supported operating systems: Windows 11 , Windows 10, Windows 8.1 , Windows 8 , Windows 7 , Windos Vista ,Windows XP (32\64-bit).

Supported languages: English , Turkish , German , Korean , French , Russian , Arabic , Greek , Slovenian , Spanish , Portuguese Brasil , Vietnamese , Indonesian , Chinese , Polish , Hungarian , Japanese , Italian , Dutch (Nederlands) , Persian , Romanian , Ukrainian , Hebrew , Bulgarian , Lithuanian

Hi, Microsoft has limited the number of items displayed. We tested it in Windows 10 and it shows a maximum of 46 items.

yul B | April 8, 2024

Hi. I added elements in SendTo but some are missing, aren't they all there? Is there a maximum link limit? Thank you for helping me...

Sordum Team | December 3, 2023

Hi , You can use a script to copy the file to a parent folder. For example, we have coded a VBScript file below. [Web Link ...](#) Download and unzip it and add the "_CopytoUpFolder.vbs" file to the SendTo folder then use it.

gabriele | December 3, 2023

Hi, how can I use this program to 'copy to higher-level folder'?

Educational bat | July 27, 2023

Please help me , how i can add microsoft apps(whatsapp) in send to menu.. for sending files direct.?

Sordum Team | July 15, 2023

You can move a file to a specific folder with a simple script file such as bat or vbs. We have coded a simple vbscript as an example. Follow the steps below.

1. Download the file. Extract it to your desktop.

[Web Link ...](#)

2. Open the SendTo folder with "shell:sendto" Run command.

3. Copy the _MoveFile.vbs file to the SendTo folder.

4. Open _MoveFile.vbs file with Notepad and enter the location of the folder you want to move the files to instead of "D:\ExambleFolder\" in the DestinationFolder = "D:\ExambleFolder\" line.

Now you can move your file to the folder you specified. By changing the name of the vbs file, you can make it appear with a different name in the SendTo menu.

ahab | July 15, 2023

Very nice tool, till now I have not found any bugs.

I'd like to suggest one feature :

Send to a folder can only cope files to the destination directory an option to move them instead is missing !

Please consider it in the next version.

Cheers ahab

Thank you for your feedback.

Sue | May 3, 2023

The "Restore Default Files" function worked for me.
Thanks for the useful programs.

Sordum Team | April 26, 2023

Hi , thanks. Noted it down , we will try to fix it as soon as possible

Martin | April 26, 2023

Hi Sordum Team, I noticed that SendTo does not work (is not able to read any items in the SendTo folder) if it has been re-located. [I assume you know what I mean]. For example, I relocated my SendTo folder to my D:\ drive.. The SendTo menu still works fine in explorer, and shell:sendto opens my SendTo folder in it's new location, but for SendTo Menu Editor it's as if my SendTo folder just doesn't exist and it isn't able to read or save any shortcuts.

Sean | February 5, 2023

Anyone know how to move the "mail recipient" under SendTo as one of the toolbar shortcuts? It's the most used right click option but the longest to get to.

Sordum Team | November 7, 2022

Hi , You need to create a vbs or bat file and add it to the SendTo folder. Below is an example of a simple bat file to move a file to the %UserProfile%\Desktop folder;

[Web Link ...](#)

Edit and add it to the SendTo folder.

Christophe MERCEY | November 7, 2022

Hi,
Nice software indeed.
Nevertheless, I am looking for a similar soft, but wich is moving the target file, not copying it. A "MoveTo Menu" if I can say so.
Any idea ?
Thank by advance.
Kind regards,

TSS | August 18, 2022

How i can settining "SendTo Menu" to open my destination folder after copy file?

Sordum Team | April 11, 2021

Send to menu does not support some file types. Which file type do you want to add ?
